21)	Solv	ve any Five out of Eight following sub questions: [10]
- /		
	a)	Define Operations Management.
	b)	Enumerate any four fragmented elements of Supply Chain.
	c)	Enumerate any four characteristics of service quality.
	d)	Describe the concept of Kaizen
	e)	Examine the concept of Decoupling Inventory.
	f)	Describe PDCA Cycle. &
	g)	List any two examples of each of Mass production process and Batch
		Production process.
	h)	Enumerate the challenges in Supply Chain Collaborations.
(2)	Solv	ve any <u>Two</u> of the following sub questions: [10]
	,	Discounting Continuous and Intermittent Organizations Process
	a)	Differentiate Continuous and Intermittent Operations Process.
	b)	Explain VED Analysis.
	c)	Paraphrase the process of Capacity planning.
		~b.

- Relate the various criteria considered while selecting appropriate **Q3**) a) operation process for food processing unit.

 - Illustrate the concept of forecasting as a planning tool. b)
- Categorize various inventory control techniques and appraise the **Q4**) a) [10]inventory control policies with respect to ABC Analysis.

M/s Unique Carb Tooling Company buys its requirement of component b) at the rate of Rs 10 each from a local vendor every quarter. The average monthly requirement of component is 600 nos. 10% extra components are procured to take care of in-process rejection. The procurement cost and inventory carrying cost have been calculated at Rs. 50 per order and 20% of average inventory investment.

Calculate:

- Economic Order Quantity to optimize the cost.
- ii) What is the total inventory cost of existing inventory policy?
- iii) How much company can save by switching over EOQ buying inventory policy?
- Compose Generic Supply Chain Structure for new start-up of vegetable Q5) a) and fruit selling company. The company receives the orders on their Android and iOS APP Workable assumptions can be considered [10] OR
 - Draw the product process matrix and map various types of industry operation processes on the same. b)

- Instructions to the candidates:

 1) All questions are compulsory.
 - 2) Each question carries 10 marks.
 - 3) Each question has an internal option.
 - 4) Use of non-scientific calculator is permitted (as applicable).
- Q1) Solve any five out of eight following sub question.

[10]

- a) Enlist any four key principles of TQM()
- b) List any four functions of Supply Chain Management.
- c) Examine the concept of 5\$.
- d) Memorize and reproduce the examples of various inventory costs.
- e) Describe the concept of Kaizen.
- f) Enumerate any four characteristics of product quality.
- g) List any four functions of PPC.
- h) State the concept of quality with respect to manufacturer's perspective.
- Q2) Solve any two of the following sub questions:

[10]

- a) Paraphrase the various types of Operations Processes
- b) Describe the concepts of Fixed Position Layout and Cellular Layouts.
- c) Distinguish and contrast MRP-I and MRP-II.
- Q3) a) 'Stop making assumptions regarding the production and start planning your capacity'. Interpret this statement with respect to auto ancillary unit. [10]

 OR
 - b) Illustrate the steps involved in Material Requirement Planning with special reference to home appliances manufacturing company. [10]

P.T.O.

Q4) a) Categorize various inventory control techniques and appraise the inventory control policies with respect to ABC Analysis. [10]
